Office hours: MWF 10 – 11 AM

Course Description:

In Public Finance, we study the economic role of the public sector. This role includes expenditure programs, revenue and resource acquisition, and regulations, which significantly affect the “rules of the game” under which other economic actors operate.

Learning Objectives:

After completing this course, you will have acquired the following knowledge and skills:

1. A familiarity with the basic efficiency and equity trade-off policy-makers face in decision-making.
2. How to use diagrams to illustrate the government’s potential role in ameliorating market failures such as public goods and externality problems.
3. How to use economic analysis to discuss income redistribution and the pros and cons of different income redistribution programs.
4. How to use the tools of economic welfare to illustrate the efficiency and equity implications of different tax regimes.
5. A working knowledge of the U.S. income tax system and the elements of the tax code which support or violate a comprehensive definition of income.

Required Materials:

Textbook: *Public Finance and Public Policy* by Jonathon Gruber

A copy of the textbook will be available for 2-hour reserve at the library.

You will also need to check Moodle regularly: <http://umonline.umt.edu/>

Grading:

Lecture Quizzes	10%
Participation	10%
First Exam (March 2)	25%
Second Exam (April 9)	25%
Final (Tuesday, May 8, 10:10 AM – 12:10 PM)	30%

Class Policies:

Remember that your learning experience and the quality of each class will depend on your level of preparation. This means doing the assigned readings and reviewing your notes before each class. The exams will cover both the assigned readings and what we talk about, so it is crucial that you do the readings and come to class consistently. If you miss a class, it is your responsibility to get notes, announcements, assignments, etc from your classmates.

Accessibility:

This course is accessible to and usable by otherwise qualified students with disabilities. To request reasonable program modifications, please come and talk to me, and make sure that you're in touch with Disability Services (243-2243) in Lommasson Center 154.

Participation:

Your participation grade is based on your class attendance, your participation in class discussions and your performance on reading quizzes, which will consist of a few brief questions to test whether you have read the article assigned for class. The articles are posted on Moodle. The quiz will occur on the day the reading assignment is due, and there will be **no make-ups**.

Exams:

Make sure you have no conflicts with the exam dates. Examinations must be taken at the assigned time or a zero will be recorded. Exceptions to this policy will only be granted for serious circumstances that are **beyond your control**. Arrangements for an exception must be made as soon as possible and in advance if at all possible. You should be prepared to provide evidence that the situation is indeed beyond your control.

Lecture Quizzes:

In addition to the reading quizzes described above, there will be five quizzes on material covered in class. These are intended to give you practice using the skills we discuss and to familiarize you with the types of questions that will be on exams. You can drop one quiz.

Academic Integrity:

I expect you to know and abide by the Honor Code in all matters pertaining to this course. Violations of this code will be pursued in accordance with the code.

Course Schedule: A tentative outline of when we will cover which subjects.

	Date	Assignment	Topic	Readings (Gruber)
